

The power behind what matters.

 **InterSystems**[®]
Health | Business | Government

WE ARE THE ENGINE BEHIND THE WORLD'S MOST IMPORTANT APPLICATIONS.

Some applications are too important to fail. They support our healthcare systems, businesses, and governments. Health. Prosperity. Society. These are things that matter. What our clients strive to enable every day. And what our software helps make possible.

OUR TECHNOLOGY

Millions of people around the world trust InterSystems with their livelihoods and even their lives. Every product we develop has been designed from the ground up with this idea in mind.

Why are we here? To ensure that our clients have reliable, real-time access to the data they need to do their jobs—data they can connect to, share, and draw insights from.

IRIS: OUR UNIQUE PRODUCT DESIGN PHILOSOPHY

Every product we build adheres to what we call the IRIS principle: Interoperable, Reliable, Intuitive, and Scalable. These four defining characteristics are what set us apart from our competitors.

INTEROPERABLE

Ensuring applications are smart, connected, and information-rich is fundamental to everything we do.

RELIABLE

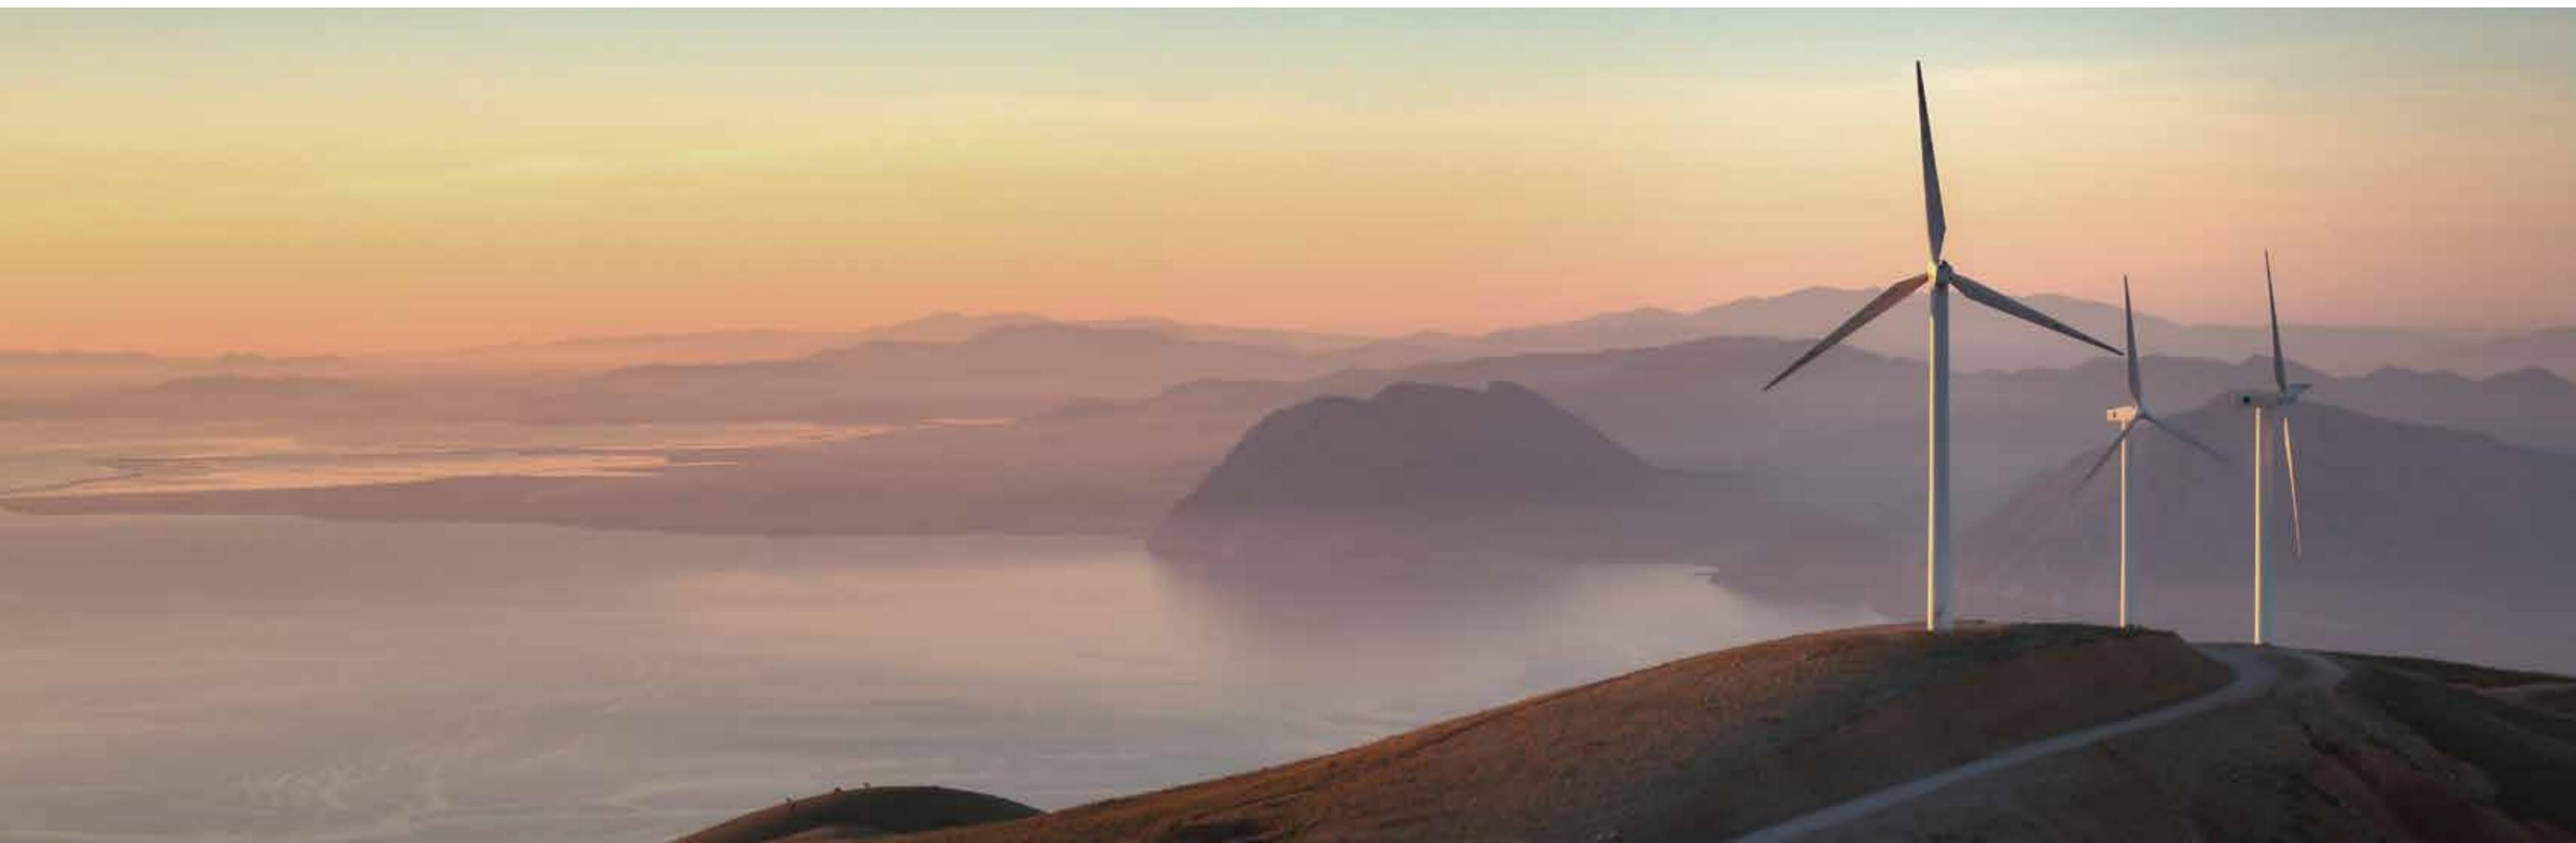

Using our technology, our clients can run their systems 24/7 without interruption.

INTUITIVE

An architecture based on elegant simplicity makes our code easy to use and manage.

SCALABLE

Our solutions can scale vertically and horizontally without sacrificing performance.

WE DO SUPPORT DIFFERENTLY.

We're all-in as a partner, and we'll do whatever it takes for our clients to be successful. Going the extra mile is our policy.

Our best people are on the front lines 24/7 to provide our clients with immediate help, and we focus our time and attention to fully meet their needs.

Every one of our clients gets help from somebody who really cares, immediately, without having to go through layers of people or process. We make it easy. And by doing that, we help our clients succeed.

PARTNERSHIP: THE ESSENCE OF WHY WE'RE IN BUSINESS.

Our clients bet their businesses on us. They know we're here for the long term and will always be responsive to their needs. We're privately owned. This allows us to focus on our clients without distractions and without worrying about Wall Street.

We take great pride in what we do and in how we take care of our clients. We constantly ask, "How will this benefit our client?" This spirit of partnership keeps us focused on what matters.

EMPOWERING HEALTHCARE TO IMPROVE CARE MATTERS.

Our healthcare solutions improve care for our clients, whether they are application vendors, providers, or entire governments—with the needs of the patient always at the center. With over 39 years of experience behind us, we're continuing to make breakthroughs in more than 80 countries. Today, the health records of more than 500 million people worldwide can be found on our technology.

KEEPING THE BUSINESS WORLD TURNING MATTERS.

From capital markets and payments to insurance and smart energy, the world's most successful companies rely on us to help solve their biggest business challenges. Our technology lets clients manage risk across multiple products and regions, keep pace with changing regulatory demands, and transform mountains of complex data into better business decisions.

HELPING GOVERNMENTS SERVE THEIR CITIZENS MATTERS.

National and local governments rely on our technology to build applications for law enforcement, administration, healthcare, and other government functions. We help them provide essential services and improve not only their own operations, but also the lives of the people they serve.

“InterSystems is here for the benefit of our clients. We strive for excellence in everything we do. And we strive to be a company that our partners can trust with their long-term future and success.”
