About the Caché Legacy Documentation Collection

InterSystems maintains an archive of some material from previous Caché releases. This archive provides a repository for content that either is deprecated or has been superseded.

Important: The following should be kept in mind when using material from this archive:

- The content of the archive is the result of past frequent requests for the information. Items can be added or removed in the future without notice.
- This material is offered on an as-is basis as an aid to those upgrading from pre-Caché 5.0 versions. Beyond making the material accessible online, no other editing of the text has occurred.
- There are no assurances made regarding the completeness of the archive, its coverage, or currency; and none should be inferred.
- If the archive content conflicts with current documentation, it is likely that the archive content is outdated and describes functionality that has been updated and/or superseded.

The current archive contents are:
