

Caché Licensing Platforms

14 February 2008

InterSystems Caché products are licensed for specific hardware and operating systems platforms. The following table shows the current platforms. Each line is a distinct platform and movement from one line to another constitutes a platform change. Depending on the license type (Platform Independent or Platform Specific) selected, a charge may apply when moving from one platform to another. For additional information, contact your InterSystems sales representative or InterSystems Order Processing (wwordproc@intersystems.com).
