

Freeing Data Through Seamless Interoperability

At InterSystems, we understand the importance of connecting data. That is why whatever your interoperability needs, in the Cloud or On-Prem, InterSystems has you covered.

InterSystems HealthShare Health Connect® is the high-performance integration engine delivering proven process management, monitoring and support for massive transaction volumes to keep your critical healthcare applications running.

InterSystems IRIS for Health™ is a data platform for the rapid development of highly scalable healthcare solutions. It also delivers all the interoperability features of HealthShare Health Connect plus advanced support for HL7® FHIR®.
