

Outsmart Disruption:

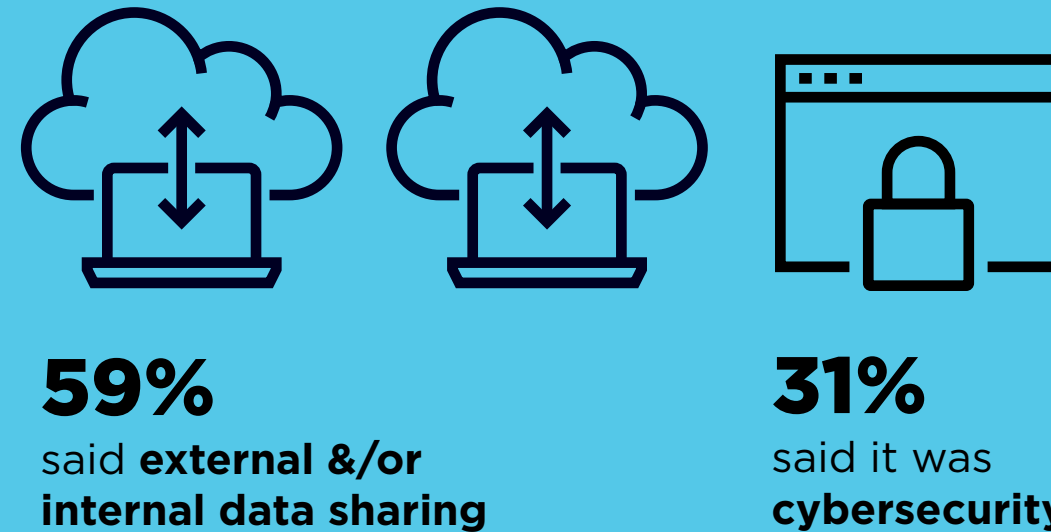

Gaining greater value and agility from your business IT infrastructure

InterSystems surveyed **IT decision makers from 150 higher education institutions across the UK and Ireland** to understand the biggest IT challenges they faced over the course of the pandemic, their expectations for the coming academic year, and their technology landscape.

Because of the pandemic...

Biggest challenges for institutions during the pandemic

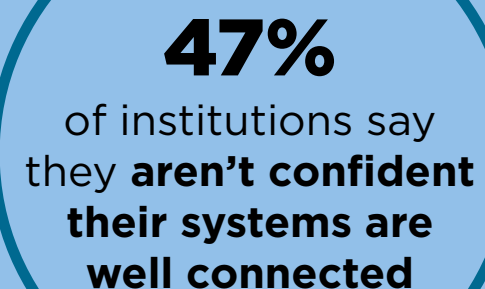

When can institutions access the data they collect?

The lack of real-time data means institutions are unable to make fast and informed decisions

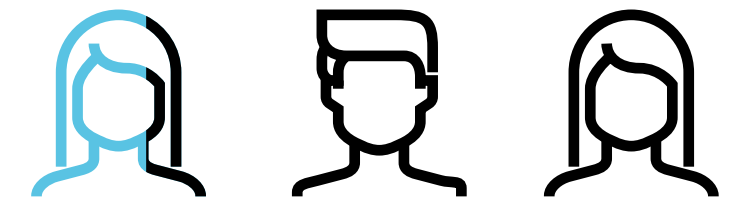

Accessing data is an ongoing challenge

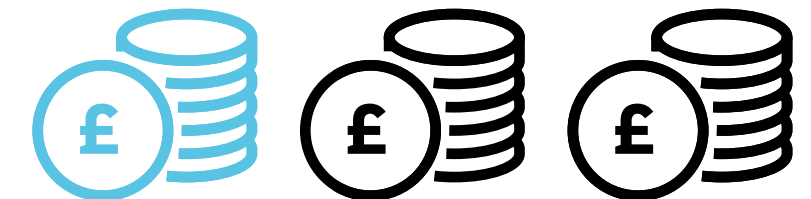

How institutions use data leaves room for improvement

22% use data to make decisions about the student experience

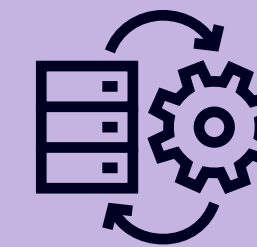

32% are planning to increase investment in a data management platform

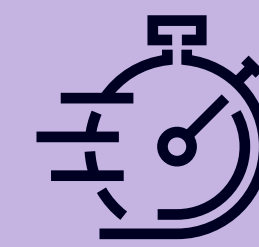

Investing in the higher education institution of the future with InterSystems IRIS

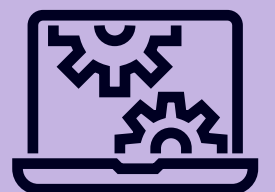

InterSystems IRIS data platform has powerful, flexible integration technology that enables you to:

Eliminate "siloes" data by connecting people, processes, and applications

Gain real-time access to data

Leverage built-in data analytics and machine learning capabilities
